Washington, D.C. 20554

RE: WC Docket No. 10-90, WC Docket No. 11-42 FCC Form 481 - Carrier Annual Reporting Ellerbe Telephone Company

Dear Secretary:

This FCC Form 481- Carrier Annual Reporting is being submitted on behalf of Ellerbe Telephone Company in accordance with FCC Rules 54.313 and 54.422. There are two copies of a Redacted – For Public Inspection version. In addition there is one copy with financial information marked as confidential information in accordance with a November 16, 2012 Protective Order, DA12-1857. A Redacted – For Public Inspection version is also being filed via ECFS.

If there are any questions, I can be reached at 704.699.9451.

Sincerely,

Jerry Weikle

Jenny Weish

Consultant to Ellerbe Telephone Company

Ellerbe Telephone Initial Five Year Service Quality Improvement Plan For the Calendar Years 2015-2019 Line 100

Discussion

Ellerbe Telephone is an ETC designated by the North Carolina Utilities Commission and is submitting its initial five year service quality improvement plan (Plan) as required by 47 CFR § 54.313(a)(1) and 54.202 (a)(1)(ii). Ellerbe Telephone is an incumbent carrier with a service area in the state of North Carolina, with 1,500 access lines served as of 12/31/2013 in one exchange. Ellerbe Telephone is a rate-of-return (RoR) regulated carrier.

The five year plan reflected herein represents Ellerbe Telephone's ongoing efforts to expand high quality, reasonably-priced broadband services throughout its service area. Ellerbe Telephone has generated a five-year plan in compliance with the Commission's rules, although the out years in the plan (years 3-5) are highly speculative in nature and thus will likely change, sometimes substantially, in future progress updates filed with the Commission. Reasons for the speculative nature of years 3-5 of the Plan include (1) the unknown nature of universal service support in those years, in light of the Commission's USF/ICC Transformation Order, (2) the difficulty in forecasting customer counts, demand, and other factors directly affecting network demand, and (3) the rapid pace of technological innovations in the communications industry makes it difficult to plan more than one or two years in advance with any degree of accuracy.

The Plan presented herein by necessity includes expenditures not directly tied to "improvements or upgrades" of Ellerbe Telephone's network, such as amounts for the maintenance and upkeep of existing telecommunications plant. In order for the Commission to accurately consider the capital and operating expenditures as related to and supported by the federal universal service programs, these types of costs are critical for such an understanding.

Initial Five Year Service Quality Improvement and Investment Plan

Ellerbe Telephone's service quality improvement and investment plan consists of two major components: (1) capital expenditures it sees as necessary to meet the voice and broadband public interest obligations as adopted by the Commission, state service quality and network build out requirements, and general upkeep and maintenance of its network; and (2) operating expenditures necessary to meet the same obligations.

As shown on the following pages, Ellerbe Telephone will work to place fiber in its distribution route to start serving homes and businesses. This will allow customers to receive a more reliable service and faster broadband speeds. Ellerbe Telephone will replace its current TDM based switch with a softswitch to provide more reliable services. Ellerbe Telephone will work to maintain its network in order to keep it operating efficiently and to avoid problems from impacting customers.

Considerations

The investment and service quality improvement plans discussed above were generated, in part, to meet or exceed the broadband public interest obligations adopted by the Commission:

230478NC100

- Speed at least 4 mbps downstream and 1 mbps upstream
- Latency 100mS or less, sufficient for real-time applications
- Capacity Unlimited capacity per month
- As an RoR regulated carrier, Ellerbe Telephone is required pursuant to 47 CFR § 54.313(f)(1)(i) to provide broadband service at 4 mbps/1 mbps upon reasonable request and within a reasonable timeframe. When customers request broadband service, employees check engineering records to determine if there are limitations on speeds. Where possible two copper pairs can be bonded to increase speeds for customers. Ellerbe Telephone currently is able to provide 4 mbps/1 mbps to the majority of customers now. It is estimated that approximately 50 customers are not able to receive 4 mbps/1 mbps primarily due to long copper loop lengths.
- Ellerbe Telephone determines into which parts of its network are feasible to upgrade and increase capacity by analyzing relevant factors such as population, demand, costs, likely revenues, regulatory requirements, and availability of work force and materials.

Ellerbe Telephone

Service Quality Standards and Consumer Protection Rules Compliance Explanation Line 510

Certification

Ellerbe Telephone Company certifies that it complies with applicable service quality standards and consumer protection rules for both voice services and broadband services.

Service Quality

Ellerbe Telephone Company is regulated by the North Carolina Utilities Commission (NCUC). The NCUC has service quality rules in effect that Ellerbe must comply with for voice services and the rules are found in NCUC Chapter 9, Rule R9-8. The NCUC does not have rules in place regarding broadband service quality.

Here is a link to Chapter 9 rules located on the NCUC website: http://www.ncuc.net/ncrules/Chapter09.pdf

Rule R9-8 requires that certain service objectives be met and that company results be reported to the NCUC on a quarterly basis within 45 days after the end of each quarter. Ellerbe has set up procedures and processes to remain in compliance with the Rule R9-8 objectives. This includes maintaining procedures and processes to record monthly results, tabulate them, and report them to the NCUC.

During the calendar year 2013, Ellerbe met all required NCUC service quality objectives. The NCUC objectives are listed below:

Rule R9-8. Service objectives for regulated local exchange telephone companies and competing local providers (CLPs).

(a) <u>Service Objectives</u>. Each regulated local exchange telephone company and CLP shall perform and provide service in accordance with the following uniform service objectives:

Measure No.	Description	Objective
1	Intraoffice completion rate	99% or more
2	Interoffice completion rate	98% or more
3	EAS transmission loss	95% or more between 2 and 10 dB
4	EAS trunk noise	95% or more 30 dBrnc or less
5	Operator "0" answertime	90% or more of calls answered within 10 seconds or ASA of 6 seconds
6	Directory assistance answertime	85% or more of calls answered within 10 seconds or ASA of 6 seconds

7	Business office answertime	ASA of 30 seconds		
8	Repair service answertime	ASA of 30 seconds		
9	Initial customer trouble reports	4.75 or less per 100 total access lines		
10	Repeat reports	1.0 report or less per 100 total access lines		
11	Out-of-service troubles cleared within 24 Hours	95% or more		
12	Regular service orders completed within 5 working days	90% or more		
13	New service installation appointments not met for Company reasons	5% or less		
14	New service held orders not completed within 30 days	0.1% or less of total access lines		

Consumer Protection

Ellerbe Telephone Company is committed to maintain the privacy of customer information. In addition to protecting personal information the company is obligated to protect information on how customers use their services. Ellerbe Telephone Company follows all requirements the FCC has mandated concerning Customer Proprietary Network Information (CPNI). As required, Ellerbe files annual CPNI compliance certifications with the FCC by March 1 each year.

Ellerbe Telephone Company also has an Identity Theft Prevention Program in place to comply with Red Flag Identity Theft prevention rules. This program ensures that no information pertaining to our customers is compromised and that information from new customers is accurate and does not represent a stolen identity.

There are no NCUC or state rules in place for broadband consumer protection. Ellerbe Telephone Company does follow federal laws relating to broadband service. Ellerbe Telephone Company does publicly disclose broadband terms and prices for customers.

Ellerbe Telephone Functionality in Emergency Situations Line 610

Backup/Emergency Power

Ellerbe Telephone's main Central Office has both battery backup and permanent mounted generator backup. When commercial power fails, batteries carry all central office equipment until the generator comes on within one minute of power failure. If the generator fails to come on, batteries can carry the central office for 12-16 hours.

One remote switch has both battery backup and permanent mounted generator backup. When commercial power fails, batteries carry all central office equipment until the generator comes on within one minute of power failure. If the generator fails to come on, batteries can carry the equipment for 16-18 hours.

Both generators at the main Central Office and the remote switch are propane powered and can run for 5-7 days on their fuel supply.

All small remote switches have battery backup that can carry the equipment for 6-10 hours in the event of commercial power failure. They also have ports where a portable generator will be connected to supply power to the remote. These portable generators are gasoline powered and can run for 4-6 hours on their fuel supply. During the event of an emergency, these portable generators are resupplied with fuel on a regular basis.

Network Facilities

Ellerbe is located in the Wilmington, NC LATA and connects to an AT&T Central Office in Rockingham, NC to connect to the Laurinburg, NC tandem. Ellerbe has redundant fiber facilities that connect to the Rockingham office that are on different geographic routes. During times of an emergency or damage to facilities, traffic is rerouted over redundant facilities as needed.

Priority Line Assignments

Ellerbe's Central Office switch is a Genband DMS-10. This switch is configured with a certain number "priority" line assignments in each line assignment group. Ellerbe assigns local municipal, fire, EMS, and rescue telephone numbers to these priority line assignment positions. Should the switch get in an overload status because of a traffic spike, it automatically prioritizes these positions to remain in service before non-priority line assignments.

Ellerbe Telephone Voice Services Rate Comparability Line 1010

The FCC released a Public Notice on March 20, 2014 (DA 14-384) which listed the urban average rate as \$20.46 for residential customers. The same Public Notice listed the rate that is a reasonably comparable benchmark at \$46.96.

Ellerbe Telephone charges all residential customers \$15.14 plus a federal Subscriber Line Charge of \$6.50 for monthly service with unlimited local calling. The total of these charges is \$21.64 which is less than the reasonably comparable benchmark of \$46.96.

Because of this, Ellerbe Telephone is able to certify that it's pricing of fixed voice service is no more than two standard deviations above the applicable national average urban rate for voice service.
